

Sr. Millwright
(Centrifuges, Pumps, Turbines)

Description:

Located in Calgary, AB, Allied Industrial Dynamics is an organization specializing in the design, manufacturing, servicing, and repair of separation and rotating equipment such as centrifuges, pumps, steam turbines and gearboxes. We are looking for full-time Rotating Equipment Specialist who can work in a fast-paced growing environment, that has an eye for detail, are able to produce quality work, safely and consistently, working with a team and independently.

Suitable applicants for this position would be a Journeyman Millwright, that has experience in rotating and industrial equipment. This role would be a leadership role, working with management in the mentoring and supervising apprentices and less experienced staff. Candidates with interest in life-long learning will be preferred as this role will constantly having to learn new machines, OEMs and taught new technologies like vibration and balancing. This role will be considered client facing and require both technical and soft skills, which can include conflict disputes and resolution.

Duties:

- Disassemble, inspect, clean, and troubleshoot rotating equipment in shop and field environments
- Perform equipment installation according to API 686 including alignments and OEM specs
- Operate and commission separation and rotating equipment
- Assemble machines in compliance with quality procedures and control methods
- Read and interpret blueprints and drawings, follow oral and written instructions, and determine tools to use with full proficiency
- Collect vibration data and report
- Manipulate and orient large pieces of equipment safely and efficiently with the use of overhead cranes and forklifts
- Safely and efficiently balance a variety of different styles of rotating equipment
- Perform clean handling and installation of high-performance bearings and seals
- Self-Motivated and able to work alone and as part of a team
- Follow and comply with all company Health and Safety and Quality policies

Personal qualifications:

- Red Seal Millwright with relevant experience
- Mechanical engineers and service engineers will also be considered
- Must have experience working with industrial machinery and be mechanically inclined.
- Must have a clean driver abstract.
- This is a safety sensitive position and will require candidates to pass Drug and Alcohol tests
- Pass fit test if required

Salary & Benefits:

- Negotiable based on experience.
- Full benefits after 3-month probationary term.
